

New Publications.

APPLETON'S NEW ATLAS
OF THE WORLD.

Containing the Latest Maps of Every Country of the World, the several States in the United States of America, and the Provinces in the Dominion of Canada. With a full Gazetteer and Indexes, and an Illustrated Descriptive Text based on the Results of the Latest Censuses.

The need of a new and authoritative Atlas of the World can not fail to be appreciated by all who will reflect upon the numerous additions to our geographical knowledge that the past year have disclosed. In political no less than in physical geography a marked development has taken place, which renders obsolete the great majority of the existing plates. In the preparation of this volume the publishers have had before them continually the single purpose of presenting to the public a work that shall in all respects rank with the best European geographical publications, and to this end no labor or expense has been spared in any one of its departments.

Descriptive circulars sent to any address on request.
